

A summary of results from numerous compromised horse studies throughout the U.S.

***Whether you live in California, Florida, Texas, or anywhere else....
Whatever your equine discipline or breed....
Revolution-Rx™ Works.***

Revolution-Rx™ has proven that it improves the health of compromised and “Special Needs” horses. Whether suffering from weight loss, severe diarrhea, chronic colic, or overall poor condition, Revolution-Rx™ delivers.

Based upon hundreds of clinical case studies on file, Revolution-Rx™ is effective 98% of the time in resolving those issues associated with dietary induced stress and related problems. Here are just a few of the hundreds of testimonials we have on file:

In California

- Twenty-six year old Appendix QH retired gelding with chronic diarrhea and weight loss. “I saw results by the end of the second week of full dosing. Thank you! Thank you! Previously, he had diarrhea so bad he need daily cleaning, and I know he was not getting the nutritional value required from his feed. I told my vet about the product, and referred it to friends who have horses in their twenties.” (Nuevo, CA)
- “I’ve had horses for 45+ years and I’ve never had this quick of a turn a round on a horse just from changing their feed!!!! I’m really happy with it.” (Ontario, CA)

In Florida

- Fifteen year old Appaloosa gelding with chronic colic (last one severe) and weight loss. “I began the study in April and my horse is doing great. He regained his weight and his coat looks great. Best of all, we have not had another bout of colic! Thanks so much -- he will be on Revolution-Rx™ the rest of his life.” (East Lake Weir, FL)

In Texas

- A twenty-three year old gelding with a severe case of chronic diarrhea over a 60-day period and ended up foundering. The owner stated, “Your product saved my horse. We are both much appreciative.” (Grapevine, TX)

In Minnesota

- Twenty year old AQH mare used for shows who had difficulty maintaining and gaining weight. “This mare is a fussy eater that wouldn’t eat her grain at all if any supplement was added to it. With Revolution-Rx™, she did not need an adjustment period and she consumed the full ration from day one. With the current rate of feed, she put on weight and consumed more water. Topline filled in and increased muscling was noticed. I would purchase this product to feed to all my horses.” (Allen, MN)

The Revolution™ Concept: A Proven Dietary Approach to Equine Wellness!

Revolution-Rx™ is **Step 1** of a two-step dietary program designed to maximize equine physiologic and metabolic function. Once Revolution-Rx™ has succeeded in correcting and stabilizing the situation, it is recommended that the horses be transitioned to either Revolution™ or to Revolution™ Concentrate as **Step 2** to prevent future relapse.

The research that ultimately resulted in the development of the Biovance equine dietary management program, began in 1985, and continues today. Revolution-Rx™, Revolution™, and Revolution™ Concentrate incorporate the patented technology that resulted from that research, a technology widely recognized and recommended by veterinarians for colic treatment and prevention and branded as ReStore™. The Revolution™ concept takes ReStore™ one step further and provides added benefits important to simplifying nutritional management strategies, while simultaneously making any feeding program safer, more effective and even more economical!

- Revolution-Rx™ * Designed as the first step in the treatment and stabilization of “Special Needs”, Compromised and Senior horses
- Revolution™ * An extruded maintenance diet for horses at risk
- Revolution™ Concentrate * A concentrated form of Revolution™ that makes any feeding program safe and effective

Revolution–Rx™ is unparalleled as a treatment for Special Needs, Compromised and Senior horses.
